TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, SQL

Frameworks and Databases: Spring Framework, Oracle DB, MySql, Electron, Angular

Tools: Git, Docker, Liquibase, Linux

WORK EXPERIENCE

Software Developer, eSolutions SA

2022 - Present

- Full-Stack Software developer primarily working on Java 8/11 microservices with Spring framework and Spring boot.
- Identified and resolved bugs in Spring MVC applications with JSP views.
- Integrated sms and whatsapp messaging using various providers.
- Integrated with external resource servers using OAuth 2.
- Designed relational schemas and used Liquibase for database migration and rollbacks.
- Utilized JUnit 4/5, AssertJ, Mockito, and Spring Tests for integration and unit tests achieving over 95% new code coverage in various projects improving overall quality of existing services.
- Fixed bugs in Angular applications and mentored developers.
- Enhanced performance by using profilers to detect and optimize SQL queries made by Hibernate JPA.
